BSBA Business Economics | Suffolk University (Boston, MA)

MAY 2021

Sawyer Business School, Honors Program

GPA: 3.781

Dean's List: 2018-2021

RESEARCH EXPERIENCE

- **Economics Undergraduate Thesis** – Researched the plausibility of immigration as a solution to mitigate the problems that an aging society faces using microdata on the income of different types of immigrant populations in the EU and the. Constructed modified Mincer earnings functions using data from the 2016 European Quality of Life Survey through STATA, with binary variables on higher education, first generation/second generation migrant status, and native/EU-birth status.
- **Economics Independent Study** – Researched the history of the Nordic model in Finland and Norway, as well as the effects of aging society on each nation. Analyzed different economic policies each nation could use to mitigate the effects of an aging society depending on the resources available to each nation.
- **Business Research Methods** – Conducted and analyzed survey of consumer's preferences of podcast topics and listening habits for Mass General Hospital and provided recommendations to potentially improve podcast downloads.
